

PROJECT CONTRACT

A low-cost, portable air purifier that gives underprivileged families clean and safe air to breathe

Air Nova is a compact, smart air purification system designed to remove harmful pollutants such as dust, smoke, germs and unpleasant odors from indoor environments. With multi-layer filtration and intelligent monitoring, Air Nova ensures cleaner, healthier, and safer air for households.

1. EXPECTED CUSTOMER BASE

- Primary Customers
 - Underprivileged families
- Secondary Customers
 - Parents
 - Care givers
 - Urban & sub-urban people
 - Health-conscious individuals

2. BENEFITS FOR COSTUMERS

Air Nova primarily helps underprivileged families by removing harmful cooking smoke and indoor pollutants, giving their children a healthier environment and a better chance at a safe, comfortable life. It improves overall air quality by reducing dust, germs, PM2.5, and odors, enhancing comfort and well-being in homes, schools, and offices.

3. WHERE TO USE THIS?

- Underprivileged homes
- Household
- Schools
- Offices
- Community centers
- Hospitals

4. WHY THIS SHOULD BUY?

- Protect Children's Health: Removes cooking smoke and harmful indoor pollutants, reducing respiratory problems.
- Improve Quality of Life: Helps children in underprivileged homes grow up in a safer, healthier environment.
- Affordable Solution: Provides clean air without high costs, making it accessible to families with limited resources.
- Daily Convenience: Easy to use and portable, suitable for everyday home use.

User Persona

Name: Mallika (32 years old)

Profile: A mother of a 4 years old and 11 years old sons, living in a slum area near Aththidiya.

Need: She needs a simple, effective solution that removes cooking smoke and indoor pollutants, allowing her children to breathe clean air even while sleeping or spending time in a small, one-room home.

User Needs	Product Attribute(s)	Engineering Specification(s)
Breathe clean air while indoors despite cooking smoke	Multi-stage filtration with pre-filter and activated carbon filter	Removes $\geq 95\%$ of smoke, dust and odors within
Safe environment for children in small, one-room homes	Multi-stage filtration	Pre-filter + Activated Carbon
Kill germs and bacteria in indoor air	Automatic UV activation	UV lamp turns on when purifier is running, shuts off when opened for safety
Easy to use without complicated setup	User-friendly, plug-and-play design	LED indicators and simple controls, portable ≤ 1 kg
Affordable for underprivileged families	Cost-effective design	Low power consumption and low maintenance
